

EBBERTS 920 - NEW

Medium-Early Maturity - Smooth Head Type

Medium-Early Maturity - Smooth

Excellent for Straw Production

Heavy Test Weight

Head Scab Resistant

Notes and Management: NEW GENETICS with ELITE YIELD performance. Dominated pre-lim yield trials the last 2 seasons. 1-2 days earlier in maturity than Ebberts 903. Big plant type with lots of tillering that maximizes straw production. Great variety for 15" row widths. Works well for all soil types and yield environments, good choice for poorly drained fields.
